Projects

InART Website
HTML, CSS, React, Firebase
  ➔ A Website I designed for the InART team to keep the team organized and contains documentations about the project
  ➔ Implemented a todo list using **Firebase** to keep track of tasks and completed work.

Personal Website
HTML, CSS
  ➔ Created my Personal Website, which has information about me and a list of projects I've done.

MyAnimeList-API
Javascript
  ➔ Used the myAnimeList api and using a cli to make it interactive.
  ➔ You can search for an anime which will give you a list of anime and upon selecting the anime you will get more details about it.
